Egor Tokarev

SAP Cloud Full Stack Developer
Yerevan, Armenia

Summary

Experienced SAP BTP Cloud Developer with 15+ years in solution design and software implementation, bridging functional and technical expertise.

Currently specializing in full-stack SAP BTP cloud development, leveraging SAP CAP (Node.js), Cloud Foundry services, HANA (+ cloud) database and modern front-end technologies such as SAP UI5 (Fiori), Fiori Elements (OData V4 services annotations), Web Components.

Strong background in classic SAP ERP (R/3, S/4HANA, ABAP stack), with deep expertise in Payments Centralization (SAP PE), Cards Management (SAP CM), Deposits Management (SAP DM), Loans Management (SAP CML). Experienced in SAP-related DevOps tasks, including Linux administration, SAP Gateway configuration, system performance tuning, transport management, and infrastructure setup.

Proven track record of delivering end-to-end implementations across all SDLC phases—Design, Build, Test, Implementation, and Post-Go-Live Support—adopting both Waterfall and Agile methodologies.

Experience

Egor Tokarev

SAP full stack developer / Architect

September 2024 - Present (2 years 2 months)

Yerevan, Armenia

- End-to-End Development: Handling everything from Architecture, UI/UX design to database modeling, API development, and deployment.
- Backend Logic & Data Modeling: Developing server-side logic using SAP Cloud Application Programming Model (CAP) and Core Data Services (CDS).

- Frontend Development: Building responsive, consumer-grade interfaces using SAP Fiori and SAPUI5.
- Cloud Deployment: Utilizing SAP BTP, Cloud Foundry to containerize and deploy MTA applications.
- Integration: Connecting cloud applications with backend on-premise systems like SAP Business One, S/4HANA or third-party APIs using OData services.
- AI Integration: Leveraging tools like SAP Joule / Claude to generate data models, services, and UI annotations.
